SINTERED STONE

OVERVIEW

- Frame is crafted of durable powdercoated aluminum
- Sintered stone top is created using quartz, silica, feldspar & clay

SINTERED STONE

- Sintered stone is produced by exposing natural minerals – quartz, silica, feldspar & clay – to intense heat & pressure, mimicking the geological process that forms stone in a fraction of the time
- Unlike engineered stone, it contains no binder
- Durable surface resists scratches & daily wear
- Heat-resistant to withstand high temperatures without burning, scorching or breaking
- Nonporous – prevents microbial growth
